International Trade Park Houston

Equity Investment Opportunity — 136-Acre Master-Planned Development Campus

12000 Bissonnet Street, Houston, Texas

LANDCO NEXA DEVELOPMENT

CONFIDENTIAL INVESTMENT MEMORANDUM — 2026

Executive Summary

A Rare, De-Risked Equity Entry Point

LANDCO NEXA is seeking a qualified equity partner to acquire the existing investor's position in International Trade Park Houston for approximately **$11.4 million** (Deemed Capital basis). This is not a concept or entitlement play — it is an operating project with measurable traction.

30 Subdivided Lots

Across industrial, multifamily, retail, and specialty use categories

~70%+ Pre-Sold

Lots presold or under active buyer negotiation, ~$28M in escrow

$26.8M MUD Bonds

Approved Municipal Utility District reimbursements — fully documented

$300M+ Vertical Value

Combined projected vertical real estate value across the campus

Project at a Glance

Total Campus Area	136 Acres
Subdivided Development Lots	30 Lots
Lot Pre-Sale / Active Negotiation	~70%+
Escrow Commitments	~$28 Million
MUD Bond Reimbursements	$26.8 Million (Approved)
Projected Vertical Real Estate Value	$300+ Million
Equity Investment Sought	~$11.4 Million (Deemed Capital)
Total Project Revenue	$61.2 Million
Project Multiple	3.03x
Equity IRR	39.3%
Project Timeline	24 to 50 Months

The Development Campus

Five Categories, One Master Plan

Located at Bissonnet Street and Cook Road with **direct Beltway 8 access** — one of Houston's most connected development corridors.

Multifamily Residential

4 lots · 48.5 acres
Serving Houston's expanding housing demand

Industrial / Flex

8 lots · 27.6 acres
Owner-operators, distribution, light industrial

Retail / Commercial

18 lots · 23.5 acres
Neighborhood-serving retail and services

Specialty & Amenity

Institutional, service, recreational, and campus environment uses

Market Validation

Proven Demand, Measurable Momentum

Over **70% of available lots** are presold or in active buyer discussions, supported by approximately **$28 million in escrow commitments**. Purchase agreements are circulating across multiple parcels, with over 30% of the master plan advancing toward vertical development.

The buyer pool is diverse and institutional in character:

- Multifamily and affordable housing developers
- Owner-user industrial and distribution operators
- Retail and neighborhood service operators
- Athletic, recreational, and specialty facility developers

70%+

Lots Presold or In Negotiation

$28M

Escrow Commitments

$300M+

Projected Vertical Value

Capital Structure

Deemed Capital Basis: Fully Documented & Auditable

The equity partner's capital basis is not a negotiated figure — it represents the verified sum of all actual capital deployed since land acquisition in June 2019, plus earned preferred return.

Land Acquisition — June 2019

$3,685,051 — Original land purchase at 12000 Bissonnet Street

Project Expenditures — 2019–2026

$4,540,432 — 374 documented and auditable line items across 7 years

Accrued Preferred Return

$3,161,805 — 8% simple interest accrued from date of each deployment

Total Deemed Capital Basis

$11,387,289 — The equity acquisition price for the incoming partner

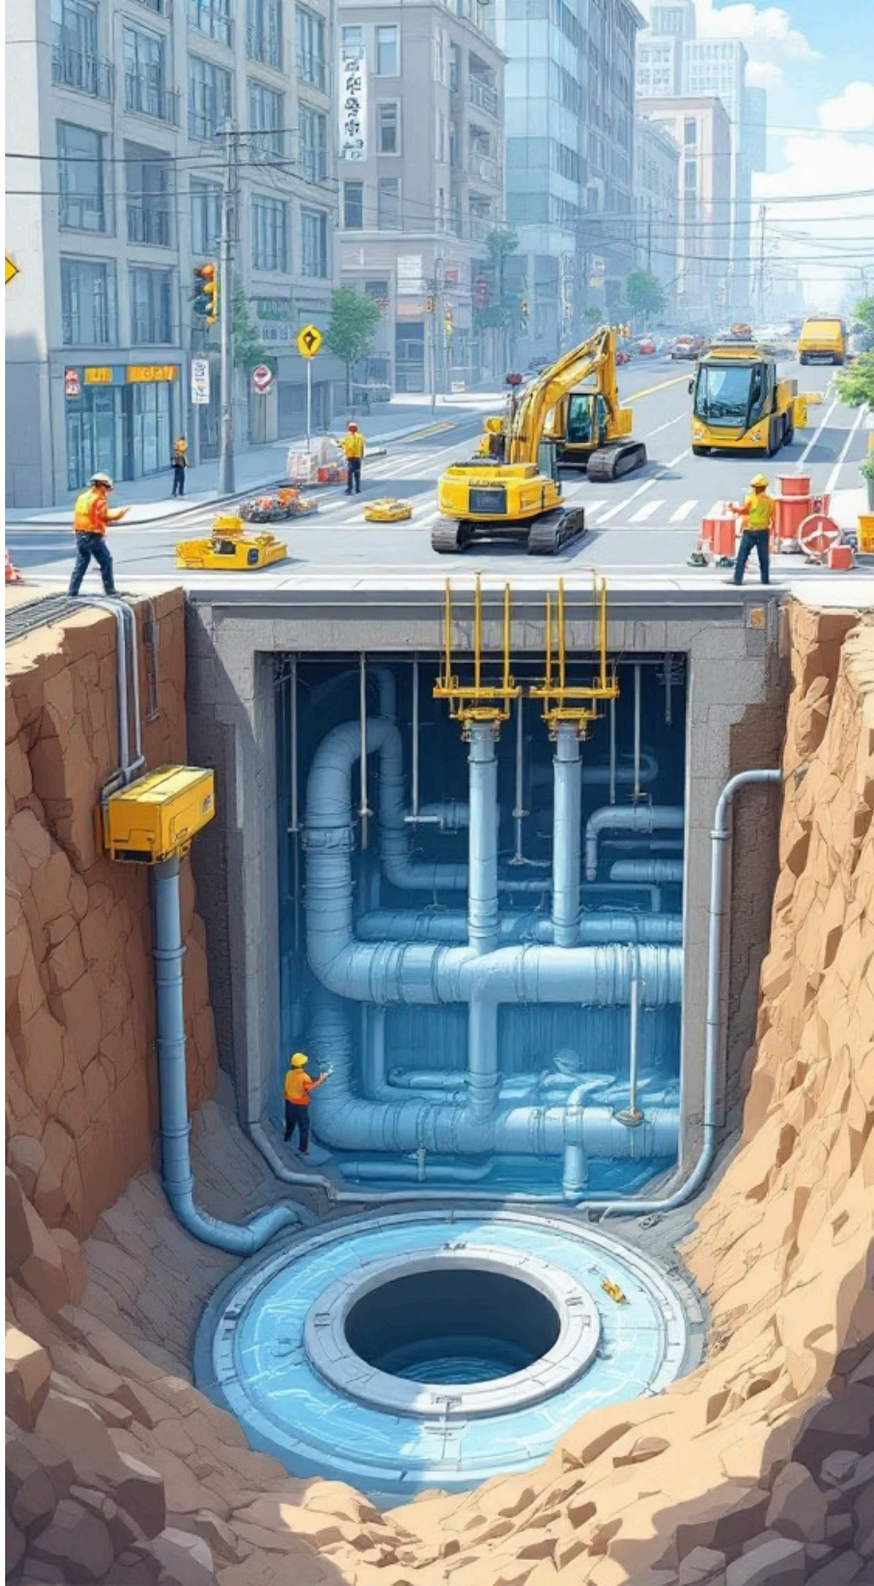
MUD Bond Reimbursement

$26.8 Million in Approved Reimbursements

The Municipal Utility District bond structure provides **$26.8 million in approved reimbursements** — a significant, non-recourse mechanism that offsets infrastructure cost and accelerates project economics.

- Infrastructure delivered in phases aligned with lot commitments
- Each phase completion unlocks additional lot sales and triggers MUD eligibility
- Non-recourse structure — no personal guarantees required
- Reimbursements flow directly to the project entity

Virtuous Capital Cycle: Infrastructure completion → lot sales close → MUD reimbursements trigger → capital redeploys into next phase. Each cycle compounds project returns without additional equity exposure.



Returns Framework

Compelling Risk-Adjusted Returns

3.03x	**63.6%**
Project Multiple	Project IRR
2.11x	**39.3%**
Equity Multiple	Equity IRR

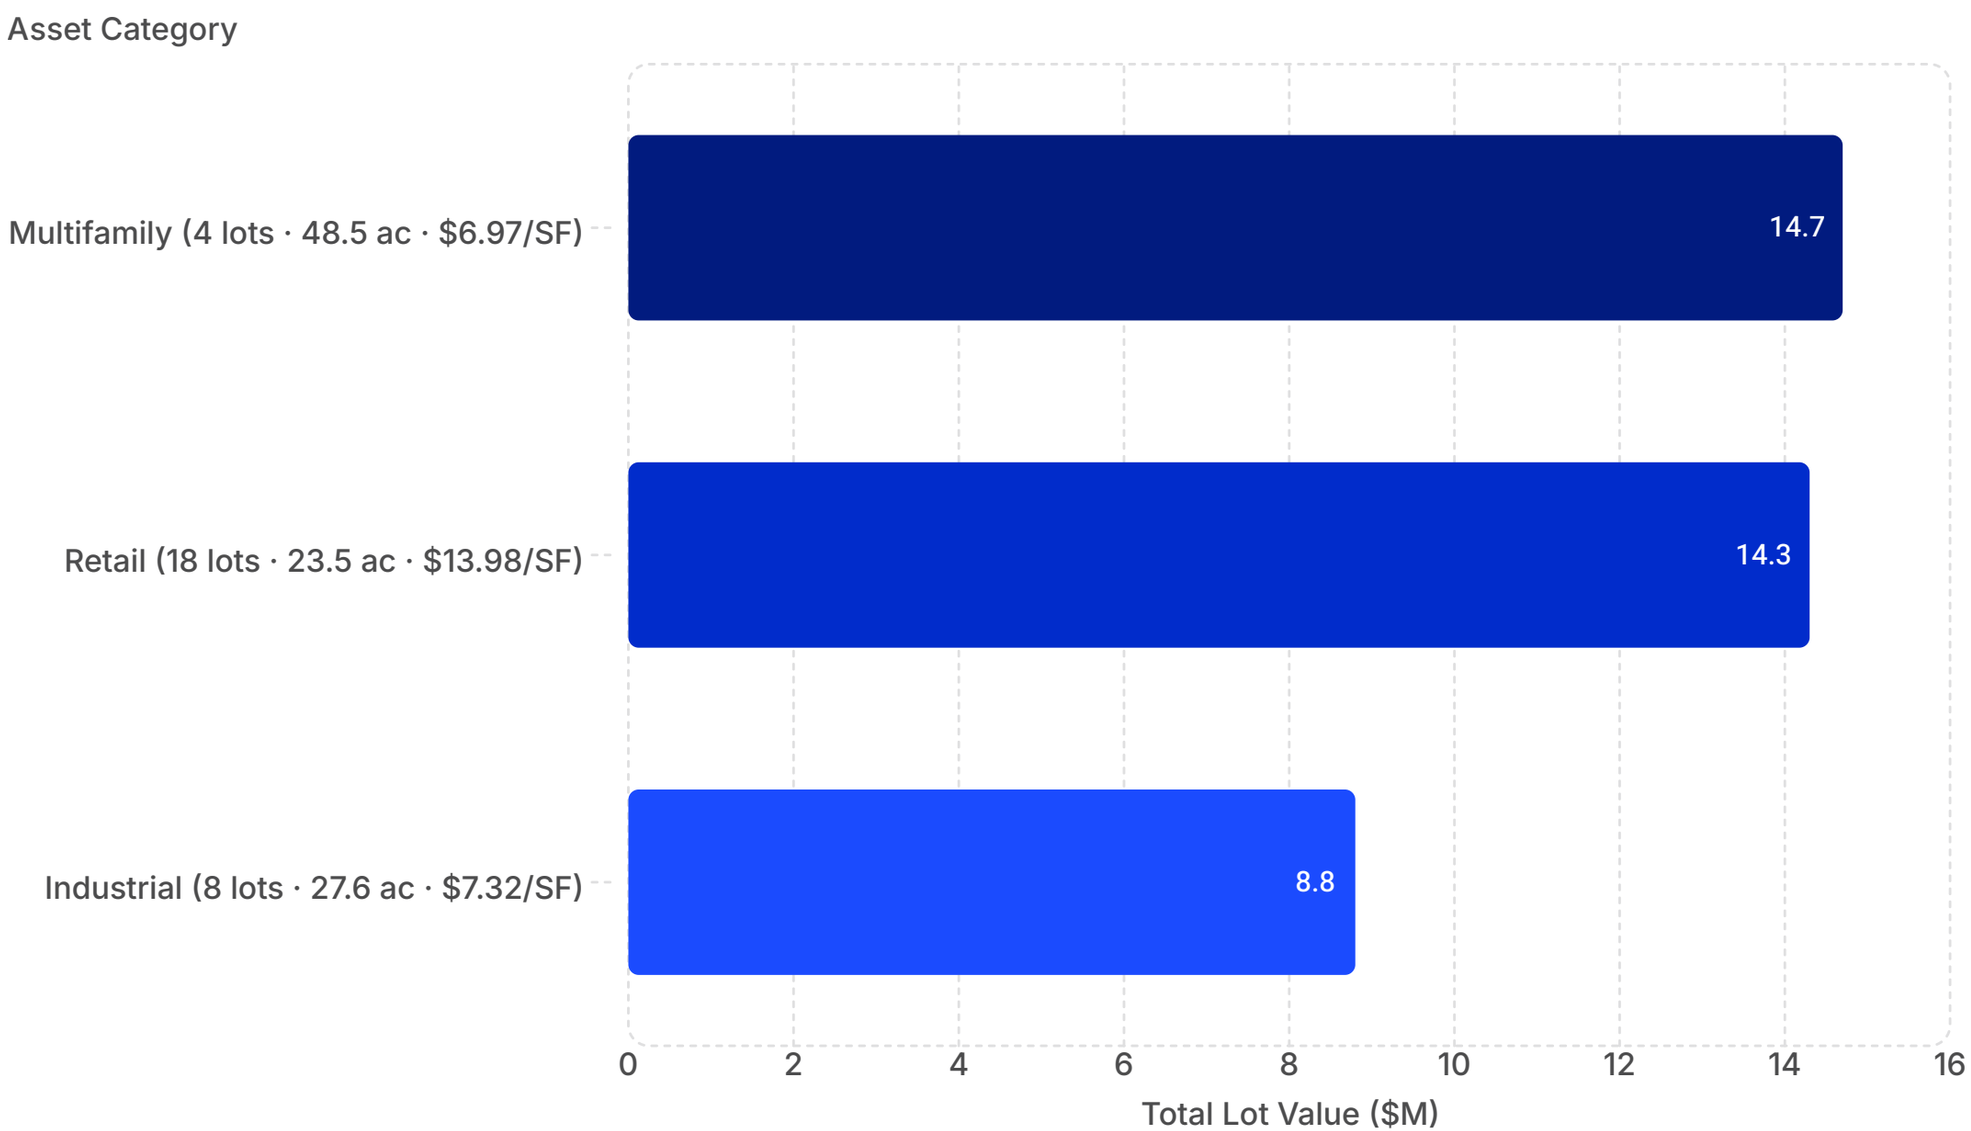
Total Project Revenue	$61.2M
Total Project Cost	$38.1M
Total Project Profit	$23.2M
Profit Split	50% / 50%
Equity Net Profit	$12.7M
Developer Net Profit	$10.5M

Revenue driven by lot sales of **$37.8M** across Industrial, Multifamily, and Retail parcels, plus **$23.4M** in MUD bond reimbursements.

Lot Sales Program

30 Development Parcels — $37.8M Net Lot Value

Lot sales are **front-loaded**, with significant revenue beginning in months 5–7. Pricing is validated by existing buyer commitments and active market comparables.



Infrastructure Phasing

$23.6M Hard Construction — Phased & MUD-Aligned

Infrastructure Item	Cost	Months
Storm Sewer System	$12.5M	12–20
Roadway Construction	$5.1M	22–25
Sanitary Sewer	$3.4M	12–20
Water Distribution	$2.0M	12–20
Erosion Control	$262K	10–27
Contingency	$277K	8–27
Soft Costs (Eng/Testing)	$1.4M	Ongoing

Each infrastructure phase is sequenced to align with lot commitments and MUD bond reimbursement eligibility — minimizing capital at risk at any given time.

Equity Waterfall

Investor-First Distribution Structure

Step 1 — Return of Capital

Equity partner receives **100% of all distributions** until full capital contribution is returned

Step 2 — Preferred Return

8% annual preferred return accrues on unreturned capital balance — earned from day one

Step 3 — Profit Split

Remaining profits distributed **50% to equity partner / 50% to developer**

Capital Contribution

$11.4M Deemed Capital

Preferred Return Earned

~$2.2M at 8% annual

Total Distributions

~$24.0M to equity partner

Net Profit to Investor

~$12.7M · 2.11x multiple

Due Diligence Platform

Live Interactive Capital Plan

LANDCO NEXA provides a **live interactive financial model** at **houstoncapitalplan.lovable.app** — a fully transparent, investor-grade underwriting environment. Equity contribution, preferred return, profit splits, and deal terms are all adjustable, with all metrics recalculating in real time.

The platform includes 9 tabs:

- Dashboard with real-time scenario controls
- Lot Schedule with editable absorption timing
- Cash Flow visualization and Capital Stack analysis
- Equity Waterfall with adjustable terms
- 374-line Expenditure history and Deemed Capital detail
- Financial Model spreadsheet viewer
- Secure Data Vault for due diligence documents
