Blended on buildable acreage

20% Open Space Dedication (~19.9 acres): Connected trail system, pocket parks, fitness stations, and a central nature corridor linking residential neighborhoods to the retail strip. Soccer park retained at NE corner. Parking integrated into retail pads. Open space generates no direct revenue but serves as marketing differentiator and community amenity.

TARGET PROFILE

Nature-lifestyle JV partner. Mark's vision: walking trails and open areas oriented toward nature and overall fitness concepts. Residential density on interior lots creates a built-in consumer base that feeds foot traffic directly to the retail strip along frontage and corner positions. The connected trail

system becomes a marketing differentiator and community amenity — positioning ITPH as a lifestyle destination, not just a commercial park.

KEY FEATURES — WALKING NATURE RETAIL CONCEPT

- **20% open space with connected trail system:** ~19.9 acres dedicated to walking trails, pocket parks, fitness stations, and a central nature corridor linking residential neighborhoods to the retail strip. Soccer park retained at NE corner. This is Mark's nature/fitness vision realized — the trail network becomes a signature community amenity and marketing centerpiece.
- **Residential feeding foot traffic to retail:** Nine interior lots (47.9 acres) converted to multifamily/townhome residential at \$7/SF. These residents become the built-in consumer base for the 21 retail lots along the frontage — a self-reinforcing economic loop where rooftops drive retail sales and retail amenities attract residents.
- **Retail strip anchored on frontage and corners:** 21 retail lots command \$15–\$18/SF with corner premium sites at Lots 1, 12, 14, 15, and 23. The largest corner parcels (Lots 14 and 15 at 13.2 and 11.2 acres) generate \$19.1M alone — nearly 37% of total revenue from two anchor positions.
- **80% buildable, 20% amenity — no wasted land:** Open space acreage is not idle — it's working land that increases adjacent lot values, attracts higher-quality tenants, and positions the development for nature-conscious JV capital. Parking integrated into retail pads keeps the trail corridors pedestrian-only.
